ABSTRACT

In spring 1989, New York City Technical College of the City University of New York compiled this factbook of student body characteristics. The document is divided into two main sections, presenting admissions and enrollment statistics. The first section provides the following admissions statistics, focusing primarily on spring 1989 admissions: an admissions profile; numbers and percentages of first-time freshmen and transfer students who registered by curricula; show rate trends from fall 1983 to spring 1989 of first-time freshmen and transfer students; college admissions averages of first-time freshmen from fall 1976 to fall 1988 and spring 1984 to spring 1989; and first-time freshman degree students by year of high school graduation and full-/part-time status. The second section provides the following enrollment statistics: (1) an enrollment profile; (2) full-/part-time enrollments for spring 1977 to spring 1989; (3) annualized headcounts for academic years 1976-77 through 1988-89; (4) enrollment trends in associate and bachelor's degree curricula from fall 1981 to spring 1989; (5) trends in full-time equivalent (FTE) enrollments from spring 1977 to spring 1989; (6) annualized FTE for academic years 1976-77 through 1988-89; (7) FTE trends by department for fall 1981 to spring 1989; (8) enrollment by class standing and gender from spring 1977 to spring 1989; (9) enrollment of full-/part-time students by gender, age, and residence; (10) college-wide re-registration, dropout and total attrition rates from fall 1983 to spring 1988; and (11) the student/faculty ratio for fall 1980 through spring 1989. FOREWORD

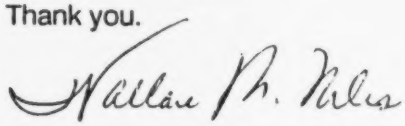
Like the Fall 1988 volume, the Spring 1989 volume of the **DATACORE** features a new and attractive appearance. Recent advances in personal computer software and hardware have enabled the Office of Institutional Research and Analysis to produce a presentation quality document that possesses the appearance of being professionally published. The new and improved **DATACORE** should prove to be an attractive reference for your own use and one that you will be proud to share with external constituencies.

It should be noted that definitional differences between computerized reports generated for use by the City University of New York and New York City Technical College, and different "freeze" dates for various computer files, may lead to slight statistical variations among different tables for the same population (for example, first-time freshmen). Therefore, when referring to the various tables in the **DATACORE**, it is advisable to pay close attention to the data source(s) listed at the end of each table.

Finally, the Office of Institutional Research and Analysis welcomes your suggestions in terms of making the **DATACORE** more relevant to your informational needs. Please forward your recommendations to the Office of Institutional Research and Analysis, Namm Hall, Room 322.

Thank you.



Wallace M. Niles, Ed. D.
Director, Institutional Research and Analysis

OVERVIEW

CONTROL: Public

New York City Technical College is a unit of the City University of New York.

ACCREDITATION: Middle States Association of Colleges and Secondary Schools.

HISTORICAL DEVELOPMENT OF NEW YORK CITY TECHNICAL COLLEGE

1946-1948: New York State Institute of Applied Arts and Sciences in New York City.

1948-1953: New York State Institute of Applied Arts and Sciences in New York City, a unit of the State University of New York.

1953-1964: New York City Community College sponsored by the New York City Board of Estimate.

1964-1979: New York City Community College, a locally sponsored unit of the City University of New York.

1980-Pres: New York City Technical College, a state funded unit of the City University of New York.

1983: Bachelor of Technology Degree in Hotel and Restaurant Management approved by New York State Education Department. First students admitted, Spring, 1984.

1986: New programs were developed in Graphic Arts Production Management (Bachelor of Technology); Legal Assistant Studies (Associate in Applied Science); Urban Horticulture (Associate in Applied Science); and Building Superintendency (Certificate).

The Weekend College commenced during the Spring, 1986 semester.

OVERVIEW

(CONTINUED)

1987: A new A.A.S. program in Telecommunications was approved during the Fall, 1987 semester.

Four Engineering Technology programs previously housed at the Voorhees Campus in Midtown Manhattan, relocated to the newly named and renovated Voorhees Hall in Brooklyn at 186 Jay Street (North Campus).

Voorhees Hall was dedicated as the new Engineering Technology Center of New York City Technical College.

A new library consolidating two branch and one main library was housed in a bi-level space in the new Atrium Building (South Campus).

The College celebrated its 40th anniversary in May, 1987.

1988: All Master Plan construction was completed during the Spring, 1988 semester, and the new Atrium Building was dedicated in May, 1988.

DEFINITIONS AND FORMULAS

EQS is an acronym for **Equivalent Students.** It is computed by dividing the student credits for the unit under observation (i.e., college, division, department) by the average full-time student credit load for that unit.

FTE Students is an acronym for **Full-Time Equivalent Students**. When observing a semester, it is computed by dividing the student credits (i.e., the sum of the number of credits plus the number of hours of non-credit remedial courses) for the unit under observation by 15, as presented in the Staff and Teaching Load Report. If an entire year is observed, the student credits are divided by 30. Continuing Education FTE is computed by dividing total contact hours by 450.

FTE Faculty equals the headcount of the full-time faculty plus the teaching hours of part-time faculty and department chairs divided by 15, as presented by department in the Staff and Teaching Load Report.

STUDENT/FACULTY RATIO is the ratio between FTE students and the Equivalent faculty. This is a State of New York definition and describes the relationship between "equated" groups of students and the faculty instructing them. It is not a headcount to headcount ratio, nor is it an average class size. It is a mathematical construct used by the State and other agencies for comparing colleges.

The following formula was used to compute the Student Faculty Ratios in this volume of the **DATACORE** (page 34):

$$\text{Student/Faculty Ratio equals} \quad \frac{\text{FTE Students}}{\text{FTE Faculty}}$$

ADMISSIONS PROFILE

A total of 1,891 first-time freshmen were accepted for admission into the College for the Spring 1989 semester. Of this total, 1,271 freshmen actually registered, which resulted in a "show rate" of 67.2% (pages 2 and 3).

A total of 570 transfer students were accepted for admission into the College for the Spring 1989 semester, and 404 actually registered, resulting in a "show rate" of 70.9% (pages 4 and 5).

The "show rates" for departments, divisions, and the entire College are computed as follows:

$$\text{Show Rate} = \frac{\text{Number of Students Who Register}}{\text{Number of Students Who Were Admitted}}$$

Approximately 45% of the Spring 1989 first-time freshmen came to the College with high school averages at or below 79.9%, including 10.7% with averages between 75 and 79.9; 17.0% with averages between 70 and 74.9; and 17.6% with averages below 70. About 14% of these freshmen obtained General Equivalency Diplomas (page 7). Further, 44% were "recent" high school graduates, having graduated from high school within the last three years (page 9).

SOURCE: ADMISSIONS AND ENROLLMENT REPORT:
NEW YORK CITY TECHNICAL COLLEGE
SPRING 1989

ENROLLMENT PROFILE

The total student enrollment for the Spring 1989 semester was 10,507, which represented an increase of 1.6% from the Spring 1988 enrollment of 10,333. The percentage of full-time students increased from 57.1% of the Spring 1988 student population to 57.5% of the Spring 1989 student population. There was a corresponding decrease in the percentage of part-time students between the Spring 1988 and Spring 1989 semesters, with part-time students accounting for 42.9% of the Spring 1988 student body and 42.5% of the Spring 1989 student body (page 12).

The **Full-Time Equivalent Students (FTE)** increased by 2.8% between the Spring 1988 (7,498 FTE) and Spring 1989 (7,721 FTE) semesters. The **Equivalent Students (EQS)** also increased between the Spring 1988 (8,023 EQS) and Spring 1989 (8,157 EQS) semesters by 1.6% (page 18).

About three-fifths of Spring 1989 degree students were freshmen (6,286 students-59.8%), while sophomores comprised 35.3% of the total (3,704 students). Less than 1% of degree students were third (0.7%) and fourth (0.6%) year Bachelor of Technology students (pages 21 and 22).

About 17% of the Spring 1989 total student body was enrolled in the Division of Health and Natural Sciences; 35.0% was enrolled in the Division of Business and Communications Technology; 27.2% was enrolled in the Division of Engineering Technology; and 16.4% was enrolled in the Division of Liberal Arts and Sciences (pages 21 and 22).

As in previous semsters, the Spring 1989 student body was nearly equally divided between males (51.1%) and females (48.9%). However, females constituted the majority of the enrollment in three of the four academic divisions: Health and Natural Sciences (73.7%); Business and Communications Technology (57.9%); and Liberal Arts and Sciences (69.4%). But males (93.0%) predominated in the Division of Engineering Technology (pages 24 and 25). Further, females outnumbered males among part-time students by 50.2% to 49.8%. But the opposite was true among full-time students, with males outnumbering females by 52.1% to 47.9% (page 26).

ENROLLMENT PROFILE
(CONTINUED)

More than 41% of the Spring 1989 total student body were between the ages of 17 and 19 (11.2%) and 20-22 (30.6%). An even larger percentage of Spring 1989 first-time freshmen (58%) were within these age groups (pages 27 and 28).

About 96% of the Spring 1989 student body resided within the five boroughs of New York City, including 64.9% from Brooklyn; 15.0% from Queens; 7.9% from Manhattan; 5.8% from the Bronx; and 1.6% from Staten Island. Between one and two percent were from New York State outside of New York City; other states within the U.S.A.; and foreign countries (page 31).

The College's "re-registration rate" between the Fall 1983 and Spring 1988 semesters ranged from a low of 75.0% for the Fall 1986 semester to a high of 83.0% for the Spring 1988 semester. Conversely, the "drop-out" rate ranged from a high of 25.0% for the Fall 1986 semester to a low of 17.0% for the Spring 1988 semester. The overall attrition rate, which accounts for students who drop out of the College and students who are academically dismissed, ranged from a low of 17.0% for the Spring 1988 semester to a high of 37.8% for the Fall 1983 semester (pages 32 and 33).
